

Trojan Masonry Sealer

Would you knowingly purchase a product that included toxic chemicals, if an alternative product were readily available that was both price competitive and quality assured?

THE TROJAN ADVANTAGE

Trojan Masonry Sealer is one such “green” product that is non-toxic, non-flammable and non-caustic. It has also exceeded nine independently performed quality tests per the American Society for Testing and Materials (ASTM),

Australian Standard (AS) and NCHRP specifications. Yet, Trojan is not just another surface coating, for it actually penetrates into the masonry that binds the loose, porous particles of the masonry into one solid mass.

The result is a waterproofed surface that is resistant to acid, oil and grease. Trojan’s penetrating polyester formula not only permanently waterproofs and preserves masonry with only one application, it also was designed for concrete, brick, stucco and most natural stones. The fact that Trojan contains very low Volatile Organic Compounds (VOC’s) means that our sealer can be safely applied indoors, such as waterproofing basements, as well as outdoors without causing any air quality issues to the applicator or occupants.

Trojan’s safety concerns also apply to the surface it is sealing. **Old historic brick & masonry requiring restoration** will not be harmed by our clear sealant and, in fact, will be further protected against future deterioration. Trojan will strengthen the substrate without changing the look of the surface. Trojan’s Ten-Year Waterproofing Warranty supports our claim!

ABOUT OUR COMPANY

Envirosafe Manufacturing Corporation has been producing safer, more effective building and maintenance supplies for over a decade. Our trademark protected formulas are researched and tested extensively before being released to the public. Every product is designed to far exceed all State and Federal EPA environmental guidelines as well as outperform numerous ASTM quality measures. As our motto indicates, we make *“Environmentally Safe Products, That Get The Job Done.”*
